Artificial Intelligence and Machine Learning undergraduate with a strong interest in AI, problem-solving, and Large Language Models. Detail-oriented and quick to learn, with hands-on experience in Python and building AI-based projects. Passionate about improving AI systems through careful analysis, logical reasoning, and high-quality work while collaborating in remote, asynchronous environments.

Education

Prathyusha Engineering College (Autonomous) Chennai, Tamil Nadu, India
B.E. in Computer Science and Engineering (Artificial Intelligence & Machine Learning)
Expected Graduation: May 2028 | CGPA: 7.78

Experience

MeanAI

Full Stack AI Developer

Remote

January 2026 - Present

- Built an AI-powered education platform leveraging Large Language Models (LLMs) to enhance personalized learning experiences.
- Designed prompts and evaluated AI-generated responses to improve answer quality and user experience.
- Conducted testing and iterative improvements to optimize AI system accuracy and reliability.
- Managed end-to-end development, deployment, and documentation using Git, GitHub, and modern web technologies.

Projects

Interviewer AI | Python, Flask, React.js, Node.js, Express.js, MongoDB, LLM

- Developed an AI-powered mock interview platform using Large Language Models (LLMs) to generate interview questions and provide real-time feedback.
- Led the project architecture, coordinated team tasks, and delivered a functional prototype within the hackathon deadline.
- Built and integrated full-stack features using React.js, Flask, Node.js, Express.js, and MongoDB.
- Presented the solution to judges, explaining the AI workflow, technical architecture, and real-world application.

MeanAI | Python, React.js, Node.js, Express.js, Flask, MongoDB, JavaScript, HTML, CSS, Large Language Models (LLMs)

- Developed scalable REST APIs and integrated AI models to deliver personalized learning experiences.
- Built a full-stack application using React.js, Node.js, Express.js, Flask, and MongoDB with a responsive user interface.
- Integrated Large Language Models (LLMs) to provide real-time explanations, question answering, and personalized learning support.
- Designed REST APIs and optimized backend services to deliver a scalable and seamless user experience.

Skills

Programming Languages: Python

AI & Machine Learning: Machine Learning, LLMs, NLP, Prompt Engineering

Web Development: React.js, Node.js, Express.js, Flask, MongoDB

Developer Tools: Git, GitHub

Soft Skills: Problem Solving, Team Leadership, Attention to Detail

Certifications

AXIOML 2026 National Level Hackathon – Certificate of Participation — Prathyusha Engineering College (Autonomous), Feb 2026
